

Early Abacus

Feminized Seeds

Lineage: Unknown

Growth: Consistent, early finisher. Superb stability with large yields. Harvest time in 80-90 days.

Flower Profile: 8%-15% CBD, below .3% delta-9 THC.* Flowers tend to be medium density, great for smokable flower or biomass. Predominant Trans-nerolidol (Grassy) terpenes.

**Test at minimum 3 weeks prior to harvest. Federal guidelines are to test at minimum 15 days prior to harvest.*
